

AMENDMENTS TO THE CLAIMS

1.- 33. (Cancelled)

34. **(Currently Amended)** An immunogenic recombinant antibody fragment comprising a protein sequence secreted from a cell comprising an expression vector including a DNA encoding either SEQ ID NO: 3 or SEQ ID NO: 4, and at least a part of the murine IgG2a subtype amino acid sequence, and wherein the protein has hamster or primate glycosylation.

35. **(Currently Amended)** An immunogenic recombinant antibody or antibody fragment comprising a protein sequence secreted from a cell comprising an expression vector including a DNA encoding at least one of SEQ ID NO: 2, 3, 4, or 5 and at least a part of the murine IgG2a subtype amino acid sequence.

36. **(Previously Presented)** The immunogenic recombinant antibody or antibody fragment of claim 35, further comprising hamster or primate glycosylation.

37. **(Previously Presented)** The immunogenic recombinant antibody or antibody fragment of claim 36, further comprising hamster glycosylation and which is produced in CHO cells.

38. **(Currently Amended)** An immunogenic recombinant antibody or antibody fragment comprising a protein sequence secreted from a cell comprising an expression vector including a DNA encoding SEQ ID NO: 2 and at least one of SEQ ID NOs: 3, 4, or 5, and at least a part of the murine IgG2a subtype amino acid sequence.

39. **(Previously Presented)** The antibody or antibody fragment of claims 34 or 35 wherein said antibody comprises the murine IgG2a subtype amino acid sequence.
